

2nd Annual

SAVE THE DATE!

Samuel Oschin Comprehensive Cancer Institute

Clinical & Translational Research Workshop

July 25th - 29th, 2011
Cedars-Sinai Medical Center,
Los Angeles, CA

What are the goals of the workshop?

This is an intensive one-week workshop in design, statistical methods, and issues in clinical and translational research. The curriculum is designed to update the knowledge base for clinical research and grant writing. The workshop will also promote collaborative interactions between translational researchers, biostatisticians and clinicians. Students will be expected to work on their own grant application throughout the week.

Who should attend?

This workshop will be of particular interest to junior and mid-level clinical researchers working in translational medicine who seek to keep current with the rapidly evolving advances in clinical trial design and translational research.

What is the course design and topics covered?

The workshop will employ a variety of teaching methods, including didactic lectures, special topics seminars, mentored collaborative grant-writing in small group sessions, oral presentations and discussion of the grants, and a mock NIH study section review. Didactic topics include issues in translational trials, biomarker studies, dose ranging and finding, middle development, ethics and scientific conduct, and adaptive designs. Steven Piantadosi, M.D, Ph.D and Christine Szekely, Ph.D will co-direct the course and faculty will include national experts in biostatistics, translational science, and clinical research from Cedars-Sinai and leading academic institutions.

Learning Objectives

Concepts in Biostatistics

Translational Trials Including Biomarkers

Early Development

Middle Development

Comparative Trials

From Bench to Bedside

Investigator Responsibilities and Ethics

Where is it?

Cedars-Sinai Medical Center is located in sunny Los Angeles adjacent to Beverly Hills, the beaches of Santa Monica, and many other attractions.

How do I apply?

The application and website will be active soon at the link below. The deadline to apply is June 1st, 2011. The number of participants accepted for the workshop is limited. All applications will be reviewed by faculty members and individuals will be selected on a competitive basis. Attendees will be responsible for travel, accommodations and some meals.
