

For Your Continuing Professional Development

Advances in Nuclear Cardiology and Cardiac CT: Annual Case Review with the Experts

Friday - Sunday, January 20 - 22, 2012
Harvey Morse Auditorium

24.5 AMA PRA Category 1 Credits™
Friday - 7:45 am to 5:30 pm;
Saturday - 7:30 am to 6:00 pm;
Sunday - 7:30 am to 3:45 pm

This three-day activity will encourage attendees to fine-tune their interpretive skills in nuclear cardiology, and become familiar with the latest advancements in cardiac CT. The course content is provided by select faculty of superb teachers and is widely known for its practical approach to all aspects of gated SPECT and the focus on cardiac CT and its relationship to nuclear cardiology. Unique program features include a combination of lectures regarding the most up to date evidence, appropriate use criteria and guidelines in each field, and a series of workshops that allow participations to review cases with an expert faculty. Each workshop focuses on a specific technical or clinical problem with time allotted for questions and answers, and attendees actively participate in the case interpretations.

New Treatment of Esophageal Diseases for the 21st Century

Monday, January 30, 2012
Harvey Morse Auditorium

8.0 AMA PRA Category 1 Credits™
7:30 am to 5:00 pm

The Cedars-Sinai New Treatment of Esophageal Diseases for the 21st Century program brings together world-renowned faculty to discuss and provide the latest information regarding the new diagnostic and treatment modalities available for esophageal disease. This one-day program will feature a thorough review of esophageal diseases, including Zenker's diverticulum, achalasia, Barrett's esophagus and GERD. The program will be divided into four sessions, each one featuring a live procedure demonstration by faculty to provide participants with a unique opportunity to witness the procedures firsthand while engaging in dialogue with the moderators regarding cutting-edge techniques.

Symposium on Neurovascular Disease 2012

Saturday, January 28, 2012
Casa Del Mar Hotel, Santa Monica

7.5 AMA PRA Category 1 Credits™
7:30 am to 5:30 pm

Neurovascular disease is the number one cause of permanent adult disability in the United States. Exciting new treatments have shown early promise, not only in preventing subsequent strokes, but reversing the effects of acute stroke. Even the evaluation and management of acute stroke, TIAs, and cerebral aneurysms are in rapid evolution. It is vital that neurologists, neurosurgeons, internists, family practitioners, and vascular surgeons, as well as allied healthcare professionals stay updated on these developing options to provide the best care for their patients.

This conference provides an interdisciplinary approach using didactic lectures, case presentations, and audience polling and participation to present new neurovascular data and discuss challenging clinical cases. Renowned regional and national faculty will present and discuss both traditional and cutting edge treatments and management strategies.

Comprehensive Approach to the Treatment of Obesity

Friday, February 10, 2012
Harvey Morse Auditorium

8.0 AMA PRA Category 1 Credits™
Friday- 8:00 am to 5:00 pm

The incidence of obesity has increased dramatically over the last several decades necessitating more vigilant screening of co-morbid disease. Despite evidence showing the metabolic benefits of even modest weight loss, safe and effective medical and surgical treatments are underutilized. The "Comprehensive Approach to the Treatment of Obesity," is intended for all health care providers who encounter patients with obesity. This program will provide an up-to-date and comprehensive review of the medical issues affecting the obese patient and outline the evolving treatment options for obesity. Advances reviewed in this program will enable health care professionals to apply the latest evidence-based guidelines to treat the obese patient.

Liver Tumors in the 21st Century

Friday - Saturday, February 18-19, 2012
Fairmont Miramar Hotel

12.5 AMA PRA Category 1 Credits™
Friday - 7:30 am to 3:50 pm
Saturday - 7:30 am - 1:45 pm

The management of patients with primary or metastatic liver tumors has changed dramatically in an astoundingly short time. Optimal patient management now demands input from well-informed individuals in a variety of specialty and subspecialty disciplines. Like never before, understanding and treating the complexities presented by such patients is a team endeavor requiring the clinician to maintain a current perspective on his/her role and the roles of others.

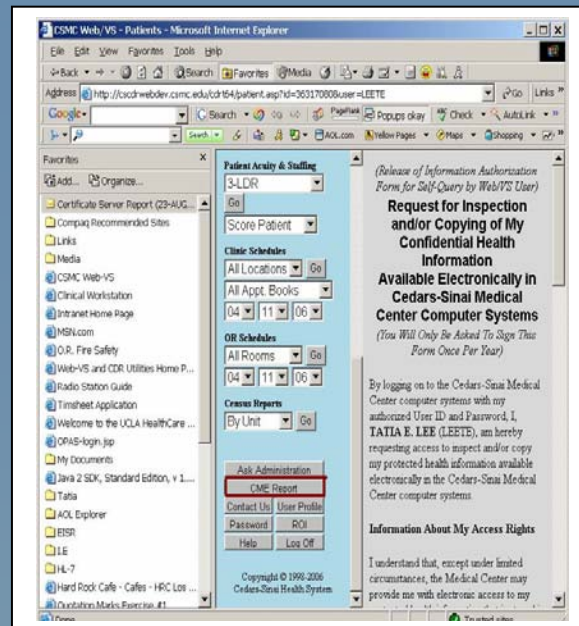

This two-day conference is intended for surgical oncologists, gastroenterologists, surgeons, primary care physicians and all other healthcare professionals who treat patients with primary or metastatic liver tumors.
