

For Your Continuing Professional Development

6th Annual Women and Ischemic Heart Disease Symposium

Friday, April 27, 2012
Harvey Morse Auditorium

8.5 AMA PRA Category 1 Credits™
8:15 am to 5:55 pm

This in depth educational symposium will explore gender specific issues in prevalence, risk factors, screening modalities, and medical management strategies, including anti-atherosclerotic preventive management, symptom management, revascularization, valvular, diastolic heart failure, atrial fibrillation, pulmonary hypertension and stem cell therapy. The purpose of this conference is to close the knowledge gap of physicians and allied health care professionals regarding sex-specific differences in cardiovascular disease and the impact these differences have on treatment options, and to highlight the importance of identifying women at risk for cardiovascular disease and utilizing the most current evidence-based treatment strategies for improved patient outcomes.

Obstructive Lung Diseases: Clinical and Pathophysiologic Approach to Evaluation and Management in 2012

Saturday, April 28, 2012
Harvey Morse Auditorium

8.25 AMA PRA Category 1 Credits™
7:30 am to 5:30 pm

This one-day live conference is geared to providing the practicing clinician with the latest clinical and translational insights and advances in obstructive lung diseases, which are key to providing state of the art work-up and treatment in 2012. Leaders in the field will present the latest on pathobiology, phenotypic classification and important systemic manifestations of COPD. In addition, state of the art approaches to cost-effective work-up and treatment, including acute exacerbations, will be presented. The role of surgical and non-surgical approaches to lung volume reduction will be discussed, including the role of lung transplantation. Other conditions including asthma, cystic fibrosis and severe tracheomalacia will also be addressed. For all topics, advances and new targeted therapies will be presented in practical and meaningful terms for the clinician.

Office Orthopaedics: The Essentials of Non-Operative Musculoskeletal Care

Saturday, May 5, 2012
Harvey Morse Auditorium

8.0 AMA PRA Category 1 Credits™
7:30 am to 5:30 pm

Disorders of the musculoskeletal system are the primary reason that individuals seek medical attention in the United States; therefore a fundamental knowledge of musculoskeletal disorders is necessary for practicing primary care physicians. The field of orthopaedics, however, is rapidly advancing which presents a challenge for primary care physicians to keep pace with advancements. The goal of this program is to provide primary care physicians with an overview of some of the most common disorders of the musculoskeletal system they frequently encounter in their practice, and to offer them an opportunity to sharpen their skills in recommending surgical techniques or non-surgical treatment plans that will restore function and range of motion to their patients.

Additional 2012 CME Programs

OPTIMAL CARE AND NEW THERAPIES FOR ADVANCED HEART DISEASE

September 15, 2012

Location: Riverside Marriott

REHABILITATION TOPICS IN THE MANAGEMENT OF BRAIN INJURY

September 15, 2012

Location: Luxe Hotel

13th ANNUAL HIV/AIDS CONFERENCE

September 28, 2012

Location: SLS Hotel

NEW THERAPEUTICS IN ONCOLOGY: THE ROAD TO PERSONALIZED MEDICINE

October 26-27, 2012

Location: Harvey Morse Aud.

MULTI-SPECIALTY PLASTIC SURGERY SYMPOSIUM AND THE BERNARD G. SARNAT, MD LECTURESHIP

November 2-4, 2012

Location: Harvey Morse Aud.

5th Annual What's New in Anatomic Pathology and Laboratory Medicine

Friday - Saturday, May 18-19, 2012
Harvey Morse Auditorium

9.0 AMA PRA Category 1 Credits™
Friday - 1:00 am to 3:30 pm;
Saturday - 7:30 am - 4:30 pm

The rapidly expanding field of pathology challenges pathologists to remain informed of novel technologies and their application to the diagnosis and treatment of disease. Over the course of this conference, our expert faculty will address the learning needs of practicing pathologists, pathology residents and clinical laboratory scientists with respect to new and relevant topics in anatomic and clinical pathology. The meeting will highlight the applications of liquid chromatography and mass spectrometry in the clinical laboratory, the use of genome based testing in the diagnosis of malignancies, and an update on methods to assess coagulation. The course will continue with presentations that address common diagnostic challenges that general pathologists face during the evaluation of lung biopsies from patients with diffuse lung diseases or pulmonary infections.

Deep Brain Stimulation: A Multidisciplinary Approach

Saturday, May 19, 2012
Fairmont Miramar Hotel

7.5 AMA PRA Category 1 Credits™
7:30 am - 5:00 pm

Over the past decade, deep brain stimulation (DBS) has rapidly become a fundamental tool in the treatment of advanced, medication refractory movement disorders. This course will provide neurologists, neurosurgeons, neuropsychologists, psychiatrists, primary care physicians, rehabilitation specialists, and allied healthcare professionals an opportunity to enhance their knowledge of a variety of topics, encompassing the multidisciplinary approach to this life saving treatment. The program will present patient selection, technical and management issues in an interdisciplinary fashion using plenary lectures, hands-on sessions and panel discussions.

Pediatrics State of the Art

Saturday, June 2, 2012
Harvey Morse Auditorium

7.25 AMA PRA Category 1 Credits™
7:30 am - 4:30 pm

Knowledge regarding the care of children with acute and chronic medical conditions continues to grow rapidly. Personalized care of each individual patient requires subspecialized practitioners who focus on these patients and conditions working hand in hand with primary care providers. This course is designed to update pediatric practitioners on cutting edge care for these common, yet challenging, conditions, with a special emphasis on multidisciplinary team and personalized medicine.

The course will include both didactic and case-based sessions, with real-time audience polling. Audience participation and interaction will be strongly encouraged. Participants are requested to bring interesting or difficult cases for faculty panel discussions.

Advanced Laparoscopic Gynecologic Surgery: A Roadmap for the Gynecologic Surgeon

Saturday - Monday, July 21-23, 2012
Harvey Morse Auditorium & SLS Hotel

24.75 AMA PRA Category 1 Credits™
Saturday - Sunday - 7:00 am to 5:30 pm
Monday - 7:00 am - 12:00 pm

The Advanced Laparoscopic Gynecologic Surgery conference will provide an in-depth review of the latest information and techniques in gynecologic laparoscopic surgery. It is designed for clinicians who desire to advance their laparoscopic skills, improve dexterity with instrumentation and suturing, and apply these skills to perform more advanced gynecologic laparoscopic surgeries in their practices. Furthermore, this comprehensive conference offers hands on experience with energy sources in addition to laparoscopic instrumentation and suturing techniques. Participants will learn and practice these basic and advanced laparoscopic skills and techniques using laparoscopic trainers, computer simulators and cadavers.
