Rehabilitation Topics in the Management of Brain Injury

Saturday, September 15, 2012
Luxe Hotel

6.25 AMA PRA Category 1 Credits™
7:30 am – 3:30 pm

Recent advances in technology and research can influence the course of recovery of the person with a brain injury. Current issues with plotting the trajectories of these specific patients' recoveries, coupled with practicing within an environment that demands total complex patient management with an attention to detail is the focus of this one day conference. A discussion on the patho-physiology of brain injury and the management of concussion will provide a basic review of the topic. Other discussions will center on management of behavioral and sensory impairments, as well as linking the participant with novel treatment approaches. Formal presentations will be accompanied by question and answer periods with general discussion.

13th Annual HIV/AIDS Conference

Friday, September 28, 2012
SLS Hotel

6.75 AMA PRA Category 1 Credits™
7:15 am to 4:30 pm

This 13th Annual conference will provide physicians and allied healthcare professionals with an interactive and engaging learning environment that addresses the evolution of the HIV/AIDS epidemic. With a combined focus on evidence-based practice and social issues, this conference represents a singular opportunity to access cutting-edge research while collaborating with eminent professionals to develop best interaction and treatment practices for this population.

Attendees will participate in four plenary sessions including a presentation on the prospects for curing HIV infection, a discussion on the evolving treatment of HIV and hepatitis C co-infection, an update on considerations for selecting optimal first-line antiretroviral regimens in treatment-naïve patients, and a lecture on the identification and management of HIV associated neurocognitive disease. Attendees may also choose to participate in various breakout sessions covering a range of issues including discussions on the management of tuberculosis co-infection in HIV-positive patients, augmenting secondary prevention efforts, nursing strategies to support treatment adherence, and interactive case discussions on the management of HIV and hepatitis C co-infection.

Multi-Specialty Plastic Surgery Symposium and the Bernard G. Sarnat, MD Lectureship

Friday - Sunday, November 2-4, 2012
Harvey Morse Auditorium

17.5 AMA PRA Category 1 Credits™
Friday - 5:15 pm to 9:15 pm
Saturday – 7:30 am to 4:25 pm; Sunday – 7:30 am to 4:30 pm

Plastic and reconstructive surgical and non-surgical procedures vary widely. Patient needs range from birth defects to facial rejuvenation, accidents to rhinoplasty, scar revision to body contouring – and all require a unique skill set and experience. This demand for aesthetic procedures and reconstruction give rise to numerous new technologies and techniques; however, keeping pace with such advances can be challenging.

This 3-day program will present participants with cutting-edge information that can be applied directly to their practice. The ultimate goals of the course are to improve patient safety and physician performance while achieving the best possible outcomes for aesthetic and reconstructive plastic surgery patients. The program will be divided into sessions with faculty panels and question and answer sessions interspersed to encourage interactivity between participants and session presenters.

Arrhythmia Symposium at the Cedars-Sinai Heart Institute – Focus On Sudden Cardiac Arrest

Friday, December 7, 2012
Harvey Morse Auditorium

7.0 AMA PRA Category 1 Credits™
5:15 pm to 9:15 pm

Sudden cardiac arrest (SCA) remains a major health problem domestically and globally today. In recent years there have been significant developments in diagnostic as well as therapeutic modalities for management of SCA. The overall goal of this program is to provide clinically relevant, state of the art information to healthcare providers regarding the management of SCA with a particular emphasis on risk stratification techniques. Special care has been taken to provide attendees with the opportunity to learn from and interact with individuals who are experts in the field of SCA. Attendees of the symposium will enhance their understanding of the diagnosis, triage, immediate management and tertiary referral of patients at risk for SCA as well as various heart rhythm abnormalities.
