

For Your Continuing Professional Development

Advances in Neurology and Neurosurgery 2013 – Bakersfield

Saturday, July 13, 2013

Bakersfield Marriott

4.5 AMA PRA Category 1 Credits™

7:30 am to 1:00 pm

The clinical neurosciences are undergoing rapid changes in the diagnosis and treatment of neurological disorders, particularly those concerning surgical treatment options. At the conclusion of this course, neurologists, internists, family practitioners, neurosurgeons, pain management and rehabilitation specialist, oncologists and allied healthcare professionals will have an increased awareness of both established and emerging treatment options for brain and spine tumors, neuromuscular and spinal disorders, and endovascular and stroke management.

Pathways to Recovery in Stroke Rehabilitation

Saturday, September 21, 2013

Luxe Hotel Sunset

7.0 AMA PRA Category 1 Credits™

7:30 am to 4:00 pm

Stroke continues to be the leading cause of long term disability. This course will focus on the latest research and clinical advances impacting the acute management and the rehabilitation of stroke patients, including research in the field of neuroscience and motor learning. Practical applications will be discussed, as well as evidence surrounding specific interventions. Topics will include the golden hour of recovery, neuroplasticity, post-stroke depression, as well as the use of technology and emerging data being collected on readmissions. Former patients will share their experience to reinforce the need of keeping stroke patients at the center of their care

Roadmap for the Gynecologic Surgeon: A Hands-On Course Focused on Minimally Invasive Pelvic Surgery

Saturday - Monday, September 21-23, 2013

Harvey Morse Auditorium & SLS Hotel at Beverly Hill

24.75 AMA PRA Category 1 Credits™

Refer to the below link for course times

This course will provide an in-depth review of the latest information and techniques in gynecologic laparoscopic surgery. It is designed for clinicians who desire to advance their laparoscopic skills, improve dexterity with instrumentation and suturing, and apply these skills to perform more advanced gynecologic laparoscopic surgeries in their practices.

This comprehensive conference offers hands on experience with energy sources in addition to laparoscopic instrumentation and suturing techniques. Participants will learn and practice these basic and advanced laparoscopic skills and techniques using laparoscopic trainers, computer simulators and cadavers.

5th Annual Los Angeles Orthopedic Trauma Symposium: Current Concepts and Controversies in Orthopedic Trauma

Saturday, September 28, 2013

Sofitel Hotel

8.25 AMA PRA Category 1 Credits™

7:30 am to 5:30 pm

Traumatic injuries remain the primary cause of death in young adults between the ages of 18-50. EMTALA legislation passed by Congress was intended to reduce inappropriate patient referrals to level-1 trauma centers. However, this legislation has had the unwanted affect of making legitimate transfer of seriously injured patients more difficult. As a result, more patients with complex injuries remain at the admitting hospital placing the responsibility for care on the surgeons practicing at non-trauma hospitals. This has increased the need for these surgeons who take emergency call to be current with contemporary methods of fracture management. This course will address the latest techniques and algorithms for the care of patients with complex musculoskeletal problems through a combination of didactic lectures, expert panel case studies, and audience questions.

Preeclampsia in 2013: What Patients and Providers Need to Know

Tuesday, October 8, 2013
Harvey Morse Auditorium

4.0 AMA PRA Category 1 Credits™
4:00 pm to 8:00 pm

Hypertensive disorders of pregnancy, such as preeclampsia, are a leading cause of maternal mortality and neonatal morbidity and mortality, in part, because of a failure of health care providers to recognize and respond to the warning signs. This course is designed to address that gap.

This symposium will provide physicians with the latest information regarding the evaluation and treatment of preeclampsia. Expert faculty will provide participants with an extensive review and the necessary tools and treatment strategies to successfully confront preeclampsia in their practice setting.

Evidence-Based Psychiatric Consultation in Medical and Surgical Settings

Friday, October 11, 2013
Harvey Morse Auditorium

7.0 AMA PRA Category 1 Credits™
8:00 am to 4:00 pm

Organized at the birthplace of Consultation Psychiatry at Cedars-Sinai Medical Center, this course is especially designed to meet the needs of psychiatrists and physicians who are interested in acquiring current knowledge about the application of evidence-based models during the course of providing and requesting psychiatric consultation in the medical and surgical settings. Methods of teaching will include lectures, clinical vignettes and group discussions. Clinical application of presented material will be provided using real-world case examples by the presenters and participants. The participants will acquire knowledge and skills in the application of evidence-based evaluation and treatment of both common and specialized psychiatric problems.

2013 Multi-Specialty Plastic Surgery Symposium and the Bernard G. Sarnat, MD Lectureship

Friday-Sunday, November 1-3, 2013
Harvey Morse Auditorium

17.0 AMA PRA Category 1 Credits™
Refer to the below link for course times

Plastic and reconstructive surgical and non-surgical procedures vary widely. Patient needs range from birth defects to facial rejuvenation, accidents to rhinoplasty, scar revision to body contouring – and all require a unique skill set and experience. This demand for aesthetic procedures and reconstruction give rise to numerous new technologies and techniques; however, keeping pace with such advances can be challenging.

This 3-day program will present participants with cutting-edge information that can be applied directly to their practice. The ultimate goals of the course are to improve patient safety and physician performance while achieving the best possible outcomes for aesthetic and reconstructive plastic surgery patients. The program will be divided into sessions with faculty panels and question and answer sessions interspersed to encourage interactivity between participants and session presenters.

Mechanical Circulatory Support: Options, Obstacles and Opportunities for the Advanced Heart Failure Patient

Saturday, November 2, 2013
Advanced Health Sciences Pavilion

9.25 AMA PRA Category 1 Credits™
8:00 am to 5:30 pm

This one-day course will provide a concise review of clinical knowledge and essential professional skills to facilitate the surgical and medical management of patients with advanced heart failure who are being assessed for and who have received durable mechanical circulatory support. The course consists of focused presentations covering a broad array of topics for both inpatient and outpatient management with an emphasis on a practical approach to patient care, implementing best practices and clinical problem solving.
