

For Your Continuing Professional Development

Current Concepts and Challenges in the Management of Pain

Saturday, March 23, 2013
Harvey Morse Auditorium

7.75 AMA PRA Category 1 Credits™
7:30 am to 5:00 pm

The relief of pain is the number one reason for patients to be present in their physicians' offices. Whether acute or chronic, intractable pain affects millions of people worldwide. In order to begin the process of managing pain, doctors must have an understanding of the mechanisms of pain, the pharmacology of analgesic medications, and the time to make a referral for more complex care. This course will provide background and an update to address these issues by highlighting the clinical science of pain medicine and state-of-the-art therapies.

Advances in Neurology and Neurosurgery 2013 – Management of Pituitary Disorders

Sunday, April 7, 2013
Hyatt Regency Huntington Beach

4.0 AMA PRA Category 1 Credits™
8:15 am to 1:30 pm

The clinical neurosciences are undergoing rapid changes in the diagnosis and treatment of neuroendocrine disorders, particularly those concerning the management of pituitary disorders. Endocrinologists, internists and allied healthcare professionals involved in the care of patients with pituitary disorders will have an increased awareness and improved ability to assess both established and emerging treatment options for the management of pituitary disorders. This course will present treatment therapy options in an interdisciplinary fashion through lectures and case presentations.

Prostate Cancer Update

Saturday, April 13, 2013
Harvey Morse Auditorium

4.0 AMA PRA Category 1 Credits™
7:30 am to 1:00 pm

This conference will review landmark studies in prostate cancer and explain the rationale behind often conflicting recommendations made by national medical organizations. State-of-the-art management and treatments for both localized and metastatic disease will be described and instructive patient cases will be discussed in small groups led by experts. The course combines didactic lectures with small working groups to allow ample opportunity for discussion, questions and comments.

7th Annual Women and Ischemic Heart Disease Symposium

Friday, April 19, 2013
Harvey Morse Auditorium

7.75 AMA PRA Category 1 Credits™
7:45 am to 5:30 pm

This in depth educational symposium will explore gender specific issues in prevalence, risk factors, screening modalities, and medical management strategies, including anti-atherosclerotic preventive management, symptom management, revascularization, valvular, Takotsubo cardiomyopathy, arrhythmia management, JNC 8 hypertension management, and menopause hormone therapy. The purpose of this conference is to close the knowledge gap of physicians and allied health care professionals regarding sex-specific differences in cardiovascular disease and the impact these differences have on treatment options, and to highlight the importance of identifying women at risk for cardiovascular disease and utilizing the most current evidence-based treatment strategies for improved patient outcomes.

Advances in Neurology and Neurosurgery 2013 – Santa Barbara

Saturday, April 20, 2013

Four Seasons Resort: The Biltmore Santa Barbara

5.75 AMA PRA Category 1 Credits™

7:30 am to 3:00 pm

The clinical neurosciences are undergoing rapid changes in the diagnosis and treatment of neurological disorders, particularly those concerning surgical treatment options. At the conclusion of this course, neurologists, internists, family practitioners, neurosurgeons, endocrinologists, oncologists and allied healthcare professionals will have an increased awareness of both established and emerging treatment options for brain and pituitary tumors, movement disorders such as Parkinson's disease, and endovascular and stroke management. The program will present the treatment options in an interdisciplinary fashion using plenary lectures and case presentations. This symposium will offer participants an opportunity to engage in interactive discussions with renowned faculty who are involved with initiating these neurological advances.

Interstitial Lung Disease and Pulmonary Hypertension: 2013 State of the Art for the Clinician

Saturday, April 20, 2013

Harvey Morse Auditorium

7.5 AMA PRA Category 1 Credits™

7:30 am to 4:45 pm

This one-day live conference is geared to providing the practicing clinician with the latest clinical and translational insights and advances in 2 broad categories of disease, presented by leaders in the field. These include Interstitial Lung Diseases and conditions causing/associated with Pulmonary Hypertension. Talks in the area of Interstitial Lung Diseases will focus on an appreciation of underlying pathophysiology/biology and how it relates to clinical presentation, diagnosis and the latest in treatment options for these conditions. With Pulmonary Hypertension, talks will address all 5 major categories of the WHO pulmonary hypertension classification, with a focus on pathobiology, clinical presentation, diagnosis and the latest advances in both medical and surgical treatment options. Further, issues related to adaptive right ventricular (RV) remodeling and later decompensation, in patients with pulmonary hypertension will be addressed.

Multiple Sclerosis (MS) Care Forum

Saturday, April 27, 2013

Sofitel Hotel Los Angeles

5.75 AMA PRA Category 1 Credits™

7:00 am to 3:15 pm

Multiple sclerosis affects people from all walks of life. This chronic and often disabling disease is commonly diagnosed in adults and often carries with it an unpredictable array of symptoms, which vary from one person to another. Today, newly established diagnostic criteria and treatment regimens can provide a ray of hope for those individuals suffering from the disease. This one-day program will provide attendees with the skills necessary to successfully manage the complex health needs and provide high quality, cost effective care to individuals with multiple sclerosis. The program will begin with an overview of the disabling disease and then continue with specific breakout sessions focused on the neurologic, rehabilitative and mental health aspects of MS. In an effort to promote comprehensive care, the program will also include a session on the importance of multidisciplinary teams and cross specialty learning. Details regarding available community resources through the National MS Society will also be discussed.

6th Annual Office Orthopaedics Conference: The Essentials of Non-Operative Musculoskeletal Care

Saturday, May 4, 2013

Harvey Morse Auditorium

8.0 AMA PRA Category 1 Credits™

7:30 am to 5:30 pm

The goal of this program is to provide an overview of some of the most common disorders of the musculoskeletal system they frequently encounter in the clinicians practice, and offer them an opportunity to sharpen their skills in recommending surgical techniques or non-surgical treatment plans that will restore function and range of motion to their patients. After the didactic presentations, there will be breakout sessions for demonstrations and hands-on practice of the various techniques
