

For Your Continuing Professional Development

Idiopathic Pulmonary Fibrosis and Pulmonary Complications of Scleroderma

Saturday, October 5, 2013

8:00 am to 6:00 pm

Harvey Morse Auditorium

7.75 AMA PRA Category 1 Credits™

The goal of this jointly sponsored symposium is to gather experts, share best practices, current cases and discuss treatment and management of two, difficult-to-manage and related diseases. Both have seen recent, significant changes in appropriate management.

IDIOPATHIC PULMONARY FIBROSIS is the most common interstitial lung disease, and its frequency is increasing. Most community based pulmonary physicians see new cases every year, but some of the key treatment recommendations have been invalidated by recently published studies, leaving pulmonary physicians without guidance on how to manage this condition. PULMONARY COMPLICATIONS OF SCLERODERMA Pulmonary involvement is a frequent complication of rheumatoid arthritis, scleroderma, lupus and other collagen vascular diseases. In fact, for scleroderma it is one of the main causes of mortality. Patients with scleroderma develop both pulmonary hypertension requiring therapy and interstitial lung disease, which may also require treatment. Interestingly, different subgroups of patients seem to develop either pulmonary hypertension or interstitial lung disease.

Could Sybil Have Died Today? Preeclampsia in 2013: What Patients and Providers Need to Know

Tuesday, October 8, 2013

3:30 pm to 8:00 pm

Harvey Morse Auditorium

3.5 AMA PRA Category 1 Credits™

Hypertensive disorders of pregnancy, such as preeclampsia, are a leading cause of maternal mortality and neonatal morbidity and mortality, in part, because of a failure of health care providers to recognize and respond to the warning signs. This course is designed to address that gap and will provide physicians with the latest information regarding the evaluation and treatment of preeclampsia. Expert faculty will provide participants with an extensive review and the necessary tools and treatment strategies to successfully confront preeclampsia in their practice setting. Designed to introduce real-life solutions that are currently applicable and available to the primary care physician, the symposium will include didactic and case based sessions, with real-time audience polling to encourage participation and interaction. Attendees will be provided with additional resources to enhance and sustain their learning, including electronic versions of the course material and web links to access more information regarding the subjects discussed at the conference.

Advances in Neurology and Neurosurgery 2013 - Palm Springs

Saturday, October 26, 2013

7:30 am to 1:35 pm

Riviera Palm Springs

5.25 AMA PRA Category 1 Credits™

The clinical neurosciences are undergoing rapid changes in the diagnosis and treatment of neurological disorders, particularly those concerning surgical treatment options. At the conclusion of this course, neurologists, internists, family practitioners, neurosurgeons, pain management and rehabilitation specialist, oncologists and allied healthcare professionals will have an increased awareness of both established and emerging treatment options for brain and spine tumors, epilepsy, and spinal disorders, and endovascular and stroke management.

The program will present the treatment options in an interdisciplinary fashion using plenary lectures and case presentations. This symposium will offer participants an opportunity to engage in interactive discussions with renowned faculty who are involved with initiating these neurological advances

2013 Multi-Specialty Plastic Surgery Symposium and the Bernard G. Sarnat, MD Lectureship

Friday – Sunday, November 1-3, 2013

Refer to program website for times

Harvey Morse Auditorium

20.0 AMA PRA Category 1 Credits™

Plastic and reconstructive surgical and non-surgical procedures vary widely. Patient needs range from birth defects to facial rejuvenation, accidents to rhinoplasty, scar revision to body contouring – and all require a unique skill set and experience. This demand for aesthetic procedures and reconstruction give rise to numerous new technologies and techniques; however, keeping pace with such advances can be challenging.

This 3-day program will present participants with cutting-edge information that can be applied directly to their practice. The ultimate goals of the course are to improve patient safety and physician performance while achieving the best possible outcomes for aesthetic and reconstructive plastic surgery. In addition, part of the course will provide physician attendees comprehensive information on non-surgical full facial rejuvenation emphasizing combination therapies. Specific therapeutic modalities will be addressed including currently recommended techniques as well as lesser-known cosmetic applications. The program will be divided into sessions with faculty panels and question and answer sessions interspersed to encourage interactivity between participants and session presenters.

Experts in MSC: Current State of the Art

Saturday, November 2, 2013
7:30 am to 5:30 pm
Hyatt Regency Century Plaza
8.75 AMA PRA Category 1 Credits™

[Register
Now!](#)

This one-day course will provide a concise review of clinical knowledge and essential professional skills to facilitate the surgical and medical management of patients with advanced heart failure who are being assessed for and who have received durable mechanical circulatory support. The course consists of focused presentations covering a broad array of topics for both inpatient and outpatient management with an emphasis on a practical approach to patient care, implementing best practices and clinical problem solving.

2nd Annual New Therapeutics in Oncology: The Road to Personalized Medicine

Friday-Saturday, November 8-9, 2013
Refer to program website for times
Harvey Morse Auditorium
10.0 AMA PRA Category 1 Credits™

[Register
Now!](#)

This 2nd annual educational activity will provide guidance to front-line clinicians, nurses, nurse practitioners, physician assistants, and pharmacists with the most current information available about new agents in oncology and the translation of the latest research to their patients. New Therapeutics in Oncology: The Road to Personalized Medicine will cover drug and treatment updates with a focus on new agents in GI malignancies, lung cancer, and lymphoma. In addition, renowned faculty will present lectures on new radiotherapy approaches, new drug and surgical treatments of breast cancer, targeting the c-MET pathway, and a discussion of new Phase I studies. On the second day of the conference, a keynote address on personalized treatment of cancer and the context of vulnerability will be featured.

State of the Art Spine Care 2013

Saturday, November 16, 2013
7:30 am to 4:00 pm
Harvey Morse Auditorium
7.0 AMA PRA Category 1 Credits™

[Register
Now!](#)

The State-of-the-Art Spine Care conference will focus on up to the moment information on the management of spine patients for the primary care and first contact providers. The faculty will be comprised of recognized spine specialists who will present lectures focusing on evaluation and conservative treatment of spinal problems, imaging and techniques available for assistance in diagnosis of a spine problem, pain management, current spine techniques and technologies, and management of the pre and post-surgical spine patient. Participants will have several opportunities for discussion and are encouraged to join faculty for discussions and debates regarding all topics.

Endocrinology & Metabolism Update 2013

Monday, December 2, 2013
2:30 pm to 8:30 pm
Harvey Morse Auditorium
5.5 AMA PRA Category 1 Credits™

[Register
Now!](#)

This CME activity will bring together physicians from a wide variety of disciplines including Endocrinology, Obstetrics/Gynecology, and Internal Medicine to provide participants with a state-of-the-art conference on endocrinology and metabolism. This course is designed to summarize and present the latest information in the diagnosis and management of endocrine/metabolic disorders, including pituitary disorders, diabetes mellitus, osteoporosis and androgen related disorders such as polycystic ovary syndrome (PCOS). In addition to state-of-the-art management of various endocrine and metabolic disorders, attendees will gain insight into areas of clinical research and controversial issues in disease management. Formal presentations will be accompanied by question and answer periods with general discussion.

11th Annual Emergency Medicine Symposium – A Practical Update

Friday, December 6, 2013
7:15 am to 5:00 pm
Four Seasons Beverly Hills Hotel
7.0 AMA PRA Category 1 Credits™

[Register

Emergency medicine physicians require continuous updates of their knowledge and skills for the prevention, diagnosis, and management of acute and urgent aspects of illness and injury. This one day course will provide an overview and update on a broad range of topics that are pertinent to emergency medicine practitioners. Our distinguished Cedars-Sinai faculty will present lectures addressing a variety of topics ranging from the use of extracorporeal membrane oxygenation (ECMO) in cardiac arrest and pre arrest scenarios; advanced ultrasound with emphasis on lumbar puncture; and ocular, vascular, and focused assessment with sonography for trauma (FAST) scan. In addition, Cedars Sinai is a national leader in the care of critically ill patients undergoing heart transplant, and our distinguished faculty will provide the community physicians and nurses' clinical pearls about providing these patients with optimal care. Attendees will have the opportunity to experience "hands-on" ultrasound scanning through the use of model or simulation, and practice some of the techniques presented at this conference.
