

For Your Continuing Professional Development

Pediatrics State of The Art 2014

Saturday, June 7, 2014
7:30 am – 4:30 pm
Harvey Morse Auditorium

7.0 AMA PRA Category 1 Credits™

[Register Now!](#)

This symposium will provide pediatric providers with the latest information regarding the evaluation, treatment and management of complex conditions commonly seen in the pediatric medical home. Participants will gain an understanding of the state-of-the-art in evaluation and treatment of these conditions. Expert faculty will provide participants with an extensive review and the necessary tools and treatment strategies to successfully confront these conditions in the medical home. The symposium is designed to introduce real-life solutions that are currently applicable and available to the primary care practitioner. The course will include both didactic and case-based sessions. Audience participation and interaction will be strongly encouraged. Participants are requested to bring interesting or difficult cases for faculty panel discussions. In addition, participants of this program will be provided with additional resources to enhance and sustain their learning, including electronic versions of the course material and web links to access more information regarding the subjects discussed at the conference.

Advances in Neurology and Neurosurgery 2014 - Bakersfield

Saturday, June 7, 2014
7:30 am – 1:00 pm
Bakersfield Marriott

4.5 AMA PRA Category 1 Credits™

[Register Now!](#)

The clinical neurosciences are undergoing rapid changes in the diagnosis and treatment of neurological disorders, particularly those concerning surgical treatment options. This course is designed for neurologists, internists, family practitioners, neurosurgeons, pain management and rehabilitation specialist, oncologists and allied healthcare professionals to increased awareness of both established and emerging treatment options for brain tumors, movement disorders such as Parkinson's disease, degenerative neurological and spinal disorders, pituitary disorders, and endovascular and stroke management. The program will present the treatment options in an interdisciplinary fashion using plenary lectures and case presentations. This symposium will offer participants an opportunity to engage in interactive discussions with renowned faculty who are involved with initiating these neurological advances.

Topics in Spinal Cord Injury Rehabilitation

Saturday, September 6, 2014
7:30 am – 3:15 pm
Luxe Hotel

6.0 AMA PRA Category 1 Credits™

Registration Coming Soon!

Every year, between 250,000 and 500,000 people in the United States have a devastating spinal cord injury, with long-term, disabling consequences. Advances in technology and research have created alternative options in the management and rehabilitation of this population. This one-day conference will provide neurologists, neurosurgeons, internists, family physicians, and physiatrists with updates in the clinical management and rehabilitation of patients with spinal cord injury and facilitate the development of competent practitioners to address these needs.

Lung Cancer and EBUS Bronchoscopy

Saturday-Sunday, September 6-7, 2014
8:00 am – 4:00 pm
Harvey Morse Auditorium

14.0 AMA PRA Category 1 Credits™

Registration Coming Soon!

In the past 5 years, there have been dramatic changes in the role of physicians in the diagnosis and staging of lung cancer. Results from the National Lung Screening Trial have demonstrated a 20% reduction in lung cancer mortality for individuals screened with low-dose chest CT. Therefore, several professional societies have now begun recommending this procedure for individuals at high risk for lung cancer. This symposium has been designed to address this need and provide physicians with the necessary tools to properly screen, stage and manage patients with lung cancer.

The first day of the symposium will focus on the role of screening in the early diagnosis of lung cancer. Faculty will discuss the appropriate selection of patients that should be screened, the design and quality control of screening programs, and the proper management of screening results. On the second day, a special hands-on course in endobronchial ultrasound and electromagnetic navigational bronchoscopy will be offered.

Comprehensive Approach to the Treatment of Obesity

Friday-Saturday, September 12-13, 2014
7:30 am – 4:30 pm
Aria Resort and Casino Las Vegas

12.25 AMA PRA Category 1 Credits™
Registration Coming Soon!

This symposium, “Comprehensive Approach to the Treatment of Obesity”, is intended for all health care providers who encounter overweight and obese patients. This program will provide a comprehensive review of the medical and surgical treatment options for obesity including the newest FDA approved pharmacologic treatment options and the newest surgical advances for weight loss. The goal of this program is to provide the clinician with practical tools to treat obesity in the office.

BRCA Symposium - 20th Anniversary of the Discovery of the BRCA Gene

Saturday, September 13, 2014
7:30 am – 3:15 pm
Sofitel Hotel

5.75 AMA PRA Category 1 Credits™
[Register Now!](#)

In recognition of the 20th anniversary of the discovery of BRCA1, this conference will provide up-to-date information for clinical providers working with BRCA mutation carriers and those at risk regarding inherited gynecologic and breast cancer. Chaired by Dr. Beth Karlan and featuring leading experts in genetics and hereditary ovarian/breast cancer, the day's presentations will be divided into three parts: genetics, clinical manifestations of BRCA1/2 in ovarian and breast cancers, and quality of life for women and their families who are living with a BRCA mutation. Leading clinical and scientific research data will elucidate new strategies in genetic testing, cancer screening and prevention, and management strategies for individuals with hereditary risk of cancer due to a BRCA mutation.

6th Annual Los Angeles Orthopedic Trauma Symposium

Saturday, September 20, 2014
7:00 am – 4:45 pm
Sofitel Hotel

8.5 AMA PRA Category 1 Credits™
[Register Now!](#)

Traumatic injuries remain the primary cause of death in young adults between the ages of 18-50. EMTALA legislation passed by Congress was intended to reduce inappropriate patient referrals to level-1 trauma centers. However, this legislation has had the unwanted effect of making legitimate transfer of seriously injured patients more difficult. As a result, more patients with complex injuries remain at the admitting hospital placing the responsibility for care on the surgeons practicing at non-trauma hospitals. This has increased the need for these surgeons who take emergency call to be current with contemporary methods of fracture management.

Advances in Neurology And Neurosurgery 2014: Treatment And Management of Pituitary Diseases

Sunday, September 28, 2014
8:00 am – 1:30 pm
Hyatt Regency Hotel - Huntington Beach, CA

4.5 AMA PRA Category 1 Credits™
[Register Now!](#)

The clinical neurosciences are undergoing rapid changes in the diagnosis and treatment of Neuroendocrine disorders, particularly those concerning the management of pituitary disorders. This activity is designed to provide endocrinologists, internists and allied healthcare professionals who are involved in the care of patients with pituitary disorders, with increased awareness and improved ability to assess both established and emerging treatment options for the management of pituitary disorders. Attendees will be presented with information on treatment therapy options in an interdisciplinary fashion through lectures and case presentations. There will be ample opportunity to engage in interactive discussions and question and answer sessions with our renowned faculty

State-of-the-Art Spine Care 2014

Saturday, October 11, 2014
8:00 am – 4:20 pm
Harvey Morse Auditorium

7.0 AMA PRA Category 1 Credits™
Registration Coming Soon!

The State-of-the-Art Spine Care conference will focus on up to the moment information on the management of spine patients for the primary care and first contact providers. The faculty will be comprised of recognized spine specialists who will present lectures focusing on evaluation and conservative treatment of spinal problems, imaging and techniques available for assistance in diagnosis of a spine problem, pain management, current spine techniques and technologies, and management of the pre and post-surgical spine patient. Participants will have several opportunities for discussion and are encouraged to join faculty for discussions and debates regarding all topics.
