Pathways to Recovery and Rehabilitation in Stroke 2016

September 24, 2016

Luxe Hotel, Los Angeles, CA 90048

6.25 AMA PRA Category 1 Credits™

Stroke continues to be the leading cause of long term disability. This course will focus on the latest research and clinical advances impacting the acute management and the rehabilitation of stroke patients, including research in the fields of neuroscience and motor learning. Practical applications and evidence surrounding specific interventions will be discussed. Topics will include management of the patient within the first hour of stroke; management of the critically ill stroke patient in acute care; neuroplasticity, motor learning and current evidence supporting rehabilitation interventions; use of technology; and integration of patient centered care principles to support optimal recovery.

October

Advances in the Management of Thyroid Cancer

October 7, 2016

Cedars-Sinai Medical Center, Harvey Morse Conference Center, Los Angeles, CA 90048

8.0 AMA PRA Category 1 Credits™

This unique one-day symposium offers participants an innovative continuing medical education experience designed to increase physician competence and performance in the diagnosis and management of thyroid cancer. In addition to cutting edge presentations from expert faculty and a tumor board, an afternoon hands-on ultrasound workshop with real patients will provide attendees with practical, evidence-based understanding of the evaluation, treatment, and new approaches currently available in the management of thyroid nodules and thyroid cancer. Program content will also review the latest evidence-based guidelines from the American Thyroid Association.
