Upcoming CME Courses

March

17th Annual Educational Meeting in Gastroenterology

March 3 - March 4, 2017

Cedars-Sinai, Harvey Morse Conference Center, Los Angeles, CA, 90048

19.0 AMA PRA Category 1 Credits™

Improve knowledge of gastrointestinal diseases and disorders and quality of care by applying acquired knowledge into practice through appropriate utilization of technology, understanding trends in interventional GI and indications for use, and fostering an evidence-based approach to decision-making for diagnosis, treatment and management of common and controversial problems in gastroenterology.

Registration: cedars-sinai.edu/gastroenterologycme

Harnessing Stress Management and Emotional Intelligence to Enhance Performance and Fulfillment: A Skills-Lab for Healthcare Professionals

March 18, 2017

Cedars-Sinai, Harvey Morse Conference Center, Los Angeles, CA, 90048

7.25 AMA PRA Category 1 Credits™

There is a growing body of literature on the need to improve well-being of healthcare professionals over the past five years. In the U.S., healthcare professionals suffer more burnout than other workers, with prevalence rates as high as 50% in physicians. Extensive research over the past decade illustrates that this issue could have a profound effect on the quality of patient care and there is concern that it might lead to early departure from the practice of medicine.

This unique course will examine the importance of wellness and provide recommendations, tools, and resources that healthcare professionals could utilize to develop resiliency, work/life balance, and self-care. By using a skills lab approach, attendees are expected to learn and practice stress management methods, and emotional intelligence techniques with the opportunity to meet in small groups with fellow healthcare professionals to acquire and practice wellness skills.

Registration: cedars-sinai.edu/psychcme

Cedars-Sinai Otolaryngology: 2017

March 24-26, 2017

Cedars-Sinai, Harvey Morse Conference Center, Los Angeles, CA, 90048

19.0 AMA PRA Category 1 Credits™

This dynamic and interactive 3-day conference will equip Otolaryngologists, Primary Care Providers, Sleep Specialists, and other healthcare providers with the most current clinical information, technological advances, innovative approaches, and recent guidelines to support the optimal care of patients presenting with sleep disorders and ear, nose, and throat conditions.

Registration: cedars-sinai.edu/Otolaryngologycme

April

Society for Brain Mapping-Satellite Symposium

May

10th Annual Conference on Office Orthopaedics: The Essentials of Non-Operative Musculoskeletal Care

May 6, 2017

Harvey Morse Conference Center, Los Angeles, CA, 90048
8.0 AMA PRA Category 1 Credits™

Disorders of the musculoskeletal system are the primary reason that individuals seek medical attention in the United States; therefore a fundamental knowledge of musculoskeletal disorders is necessary for practicing primary care provider. The field of orthopaedics, however, is rapidly advancing which presents a challenge for primary care providers to keep pace with advancements. The goal of this program is to provide primary care physicians with an overview of some of the most common disorders of the musculoskeletal system they frequently encounter in their practice, and to offer them an opportunity to sharpen their skills in recommending surgical techniques or non-surgical treatment plans that will restore function and range of motion to their patients.

11th Annual Women and Ischemic Heart Disease Symposium

May 12, 2017

Harvey Morse Conference Center, Los Angeles, CA, 90048
7.0 AMA PRA Category 1 Credits™

This in depth educational symposium will explore gender specific issues in prevalence, risk factors, screening modalities, and medical management strategies, including antiatherosclerotic preventive management, symptom management, hypertension, cholesterol, hormone therapy, STEMI, resorbable stents, heart failure, statin intolerance, and coronary microvascular dysfunction. The purpose of this conference is to close the knowledge gap of physicians and allied health care professionals regarding sex-specific differences in cardiovascular disease, the impact these differences have on treatment options, and to highlight the importance of identifying women at risk for cardiovascular disease by utilizing the most current evidence-based treatment strategies for improved patient outcomes.
